Core Agent Setup

Establish a high-impact Agentforce setup to support **common business scenarios**.

- Create a new Agent
- Associate topics and actions based on your business processes (eg. lead routing, case resolution, campaign engagement)
- Build custom agent actions using Salesforce Flows
- Update an existing deployment flow to include the new Agent
- Assign licenses and user permissions
- Test and deploy

Scope of Initial Implementation

To ensure focused delivery and measurable outcomes, the initial deployment includes:

- Up to 3 topics aligned to priority use cases
- Up to 5 custom actions using Flows or CRM logic
- Focus on low to medium complexity (e.g. record updates, lookups, notifications)
- Advanced integrations, external APIs or multi-cloud orchestration to be scoped separately if needed
- Connect to Salesforce Knowledge (if available) for contextual responses
- Access CRM records to personalise interactions and drive next-best actions
- 1 x enablement session (up to 1 hour) for users and admins

What is included in this Agentforce Package

Optional Add-On Agents

Order Management – Handles order lookups, returns, exchanges, and delivery updates

Process Automation – Streamlines internal workflows such as case closure and approvals

Knowledge – Provides instant answers from Knowledge Articles

Sales Assistant – Supports pipeline management, lead follow-up, and next-best actions

Marketing – Qualifies leads, triggers campaigns, and engages prospects

Multilingual – Responds in the customer's preferred language

Field Service – Assists onsite teams with scheduling, updates, and task execution

What is not included?

While our package is comprehensive, some elements are **outside the scope**.

However, for these additional features, our team can work with you to create custom solutions.

Features that are not a part of our Smart Flow Package:

- Development of more than 3 topics or 5 custom actions
- Advanced cross-object orchestration (e.g. coordinated workflows across multiple objects)
- Third-party integrations (e.g. external APIs, payment systems, logistics platforms)
- Data Cloud configuration or harmonisation
- Einstein GPT Prompt Builder setup or large language model customisation
- Complex Apex development beyond Flow-based actions
- Deployment of agents across multiple Experience Cloud sites
- Design or reconfiguration of customer-facing messaging channels

To ensure smooth
implementation, we
require

Signed Statement of Work (SoW) with **Brysa**.
