What is not included?

While our package is comprehensive, some elements are **outside the scope**.

However, for these additional features, our team can work with you to create custom solutions.

Features that are not a part of this Package:

- Designing any creative content (HTML or other)
- Lead functionality in Salesforce (except for integration and page layouts)
- Custom object integration
- Setting up custom roles in Marketing Cloud
- Setting up Salesforce Campaigns
- Data Cleansing

Since we are not a creative marketing agency, we will be relying on your team to provide us with the following:

- All creative content, including HTML emails, styling for forms and whitepapers.
- Strategy for any engagement/drip campaigns.

We will work with your IT team to address the following items, and it will be up to you to make the required changes on your end:

- Vanity URL (CNAME) & Email Authentication: We'll configure Marketing Cloud, and you are responsible for updating your DNS settings
- Website Tracking Code: We will provide you with website tracking code and you will be responsible for adding this to your website. If you use wordpress, there is a plugin available for this.

Prerequisites

To ensure smooth
implementation, we
require

Signed Statement of Work (SoW) with **Brysa**.

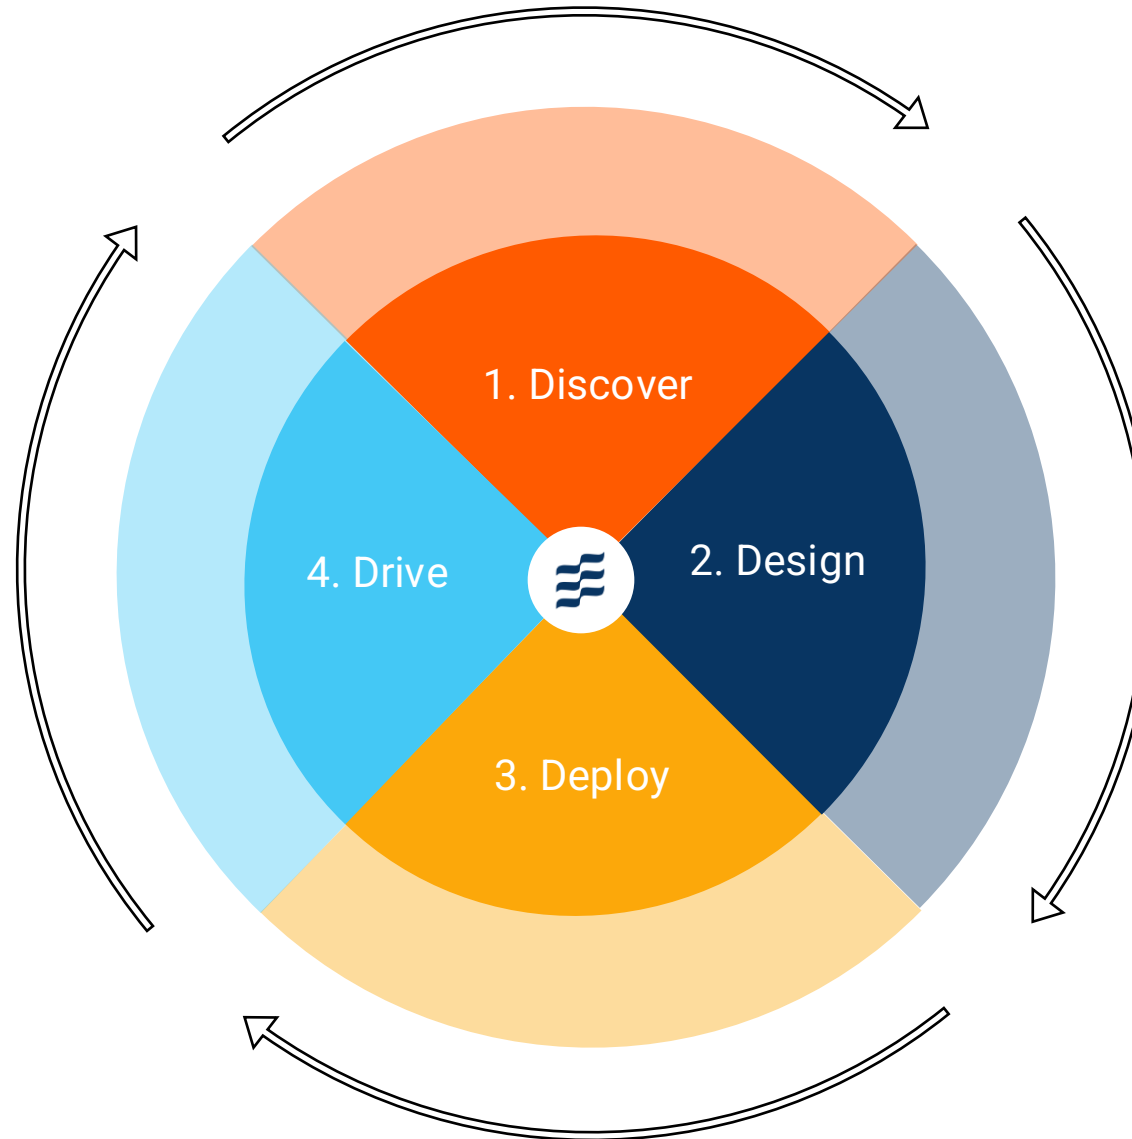

A new, clean Salesforce instance with appropriate licences.

Clean data, provided in the right format.

Process

The Brysa Way

As trusted Salesforce experts, Brysa is committed to delivering excellence.

Our experienced consultants coupled with a client focused approach make us the partner of choice for organisations looking to achieve Salesforce success.

We call this the
Brysa Effect.

Automated operations.
Systems harmonised.
Technical debt reduced.
And employees in **flow**, embracing
an AI-powered world.
